PROFILE

Seeking an opportunity as a .NET Web Developer to leverage my expertise in building scalable and responsive web applications using ASP.NET, C#, SQL Server, and front-end technologies. Passionate about delivering high-performance solutions and ensuring cross-browser compatibility.

PROJECTS

- INTERNSHIP (BESANT TECHNOLOGY)
- E-commerce Website (ASP.NET) (AUG2024 - JAN2025)
- Technologies Used : [Html ,Css ,Js, Asp. NET, C#, Sql Server]
- Developed a full-stack e-commerce platform using ASP.NET, C#, and SQL Server.
 - Implemented user authentication, product management, and a secure shopping cart system.
 - Integrated payment gateway for seamless transactions.
 - Designed admin dashboard for order management, inventory tracking, and user analytics.
 - Ensured data security and optimized performance for a smooth user experience.

- Employee Management System (WINDOWS)
- Technologies Used : [Window Forms, C#, Sql Server]
- Authentication: Secure login and registration for employees and admins.
 - CRUD Operations: Manage employee data with Create, Read, Update, and Delete functions.
 - Admin Controls: Manage roles, update salaries, and generate downloadable payslips with images.
 - Payslip Generation: Automated and secure payslip creation and distribution.
 - Data Security: Ensured encryption and access control for sensitive information.
